

BNB RUMMY

AN ALGERIAN TEAM RUMMY VARIATION

OFFICIAL ILLUSTRATED RULEBOOK

Created and documented by **Benyoub Mohamed Riadh**

Tiaret, Algeria

Version 1.1 • August 2026

A four-player, two-team Rummy variation built around a 71-point opening, clean sequences, shared-table play, strict discard rules, wild jokers, and team scoring.

1. At a Glance

Feature	BNB Rummy rule
Players	4 players forming 2 teams of 2; teammates sit opposite each other.
Direction	Play proceeds anticlockwise.
Cards	2 standard 52-card decks + 2 jokers; exactly 2 physical copies of every normal card.
Normal hand	14 cards per player; dealer starts with 15 and does not draw on the first turn.
Opening	At least 71 points, including at least one clean sequence of 3+ cards.
Jokers	Completely wild; maximum 1 joker in a single combination.
Finish	When a player legally gets rid of their cards, the round ends immediately.
Target	Teams agree before play; usual target is 400, or 600 for a longer game.

2. Setup & Dealing

Players and teams

- 4 players form 2 teams of 2.
- Teammates sit opposite each other.
- Play proceeds anticlockwise.
- Use 2 standard 52-card decks plus 2 jokers.

Dealing

Normally each player receives 14 cards. The dealer receives 15 cards and does not draw on the first turn; the dealer starts by playing/discarding. After the round, the deal moves anticlockwise.

If the initial deal gives a player too many or too few cards, the opposing team immediately receives 100 points. The deal is cancelled and the next player deals.

If a player accidentally has 13 or 15 cards during play, they continue with that hand and may open normally, but they cannot finish the round themselves. Their teammate can still finish.

Example: the dealer begins with 15 cards. Because the dealer does not draw on the first turn, the first action is to play/discard.

3. Card Values & Combinations

Card	Value
2–10	Face value
J, Q, K	10
Ace in A-2-3	1
Ace in Q-K-A	10
Ace in the middle	Not allowed
Joker in a combination	Value of the card it represents
Unplayed joker left in hand	50 points

Valid sequences

♥ 4-5-6 ♥ 10♣-J♣-Q♣-K♣ Q♦-K♦-A♦

Groups

A group uses the same rank in different suits. A group can contain at most 4 cards.

Important: combinations cannot be rearranged after being placed; they remain as originally played.

4. The 71-Point Opening

To open, a player must place at least 71 points in combinations. At least one sequence of 3 or more cards in that opening must be clean — it contains no joker.

Example A — legal opening

10♣-J♣-Q♣-K♣ = 40 points

9♠-9♥-9♦ = 27 points

4♥-5♥-6♥ = 15 points

Total = 82 points. The 4♥-5♥-6♥ sequence is clean, so the opening is legal.

Example B — not enough points

7♠-8♠-9♠ = 24 points; 10♦-J♦-Q♦ = 30 points; total = 54. Even though there is a clean sequence, 54 is below 71, so the player cannot open.

Escalating opening requirement

If an unopened player opens with a score, the next unopened player must open with a higher score. This applies to teammates as well as opponents. Once a player has opened, they no longer need to meet the 71-point opening requirement on later turns.

Example: Player A opens for 74. The next unopened player must open for more than 74 — 75 or higher — while still satisfying the clean-sequence requirement.

5. Taking Discards & Extending the Table

A player may take only the most recently discarded card from the player immediately before them.

If the player is unopened, taking that card must allow them to open immediately with the required points and clean sequence. If already opened, the discarded card must be used immediately in a new combination; it cannot simply be added to an existing combination.

After opening, any player may extend any combination on the table. This includes their own combinations, their teammate's combinations, and either opponent's combinations. Sequences may be extended at either end; groups may be extended by adding a missing suit.

Example: if 7♦-8♦-9♦-10♦ belongs to the opposing team, an opened player may still extend it with 6♦ or J♦.

6. Jokers

Each joker is completely wild and can represent any card. Only one joker may be used in a single combination.

Example: 5♣ + 6♣ + Joker can represent 7♣.

Replacing a joker

A player may replace a joker with the exact real card it represents and take the joker. The recovered joker must be used immediately during the same turn. It may be used by extending an existing combination or creating a new combination, including an opponent's combination.

In a group, the joker can only be taken after all missing cards needed to complete the group have been supplied. The recovered joker must then be used immediately.

An unplayed joker remaining in a player's hand at the end of a round is worth 50 points.

7. Discard Restrictions

A card cannot be discarded if it can be used as an extension of any combination currently on the table. The restriction applies to combinations belonging to the player, the teammate, or either opponent. It also applies when a card could replace a joker.

The two-copy exception

There are exactly two physical copies of every normal card. If a player has both physical copies of a card, they may discard one copy while keeping the other.

Example: if an 8♣ can extend a sequence on the table and you hold both physical copies of 8♣, you may discard one 8♣ while keeping the other.

8. Finishing & Scoring

When a player legally gets rid of their cards and finishes, the round ends immediately.

A player who accidentally has 13 or 15 cards cannot finish under any circumstances; only their teammate can finish for the team. If such a player reaches a position where the hand size and discard restrictions leave no legal way to continue and they accidentally finish, the opposing team receives 100 points.

Round scoring

When a player finishes, score the opposing team's two players separately. If an opposing player opened, count the values of all cards remaining in that player's hand. If they never opened, that player automatically counts as 100 points. Add the two penalties together and award the total to the team that finished.

Opponent	Situation	Penalty
Player B	Opened; remaining cards = $8 + K + 5$	23
Player D	Never opened	100
Winning Team A	Total awarded	123

If neither opponent opened, the winning team receives 200 points.

9. Draw Pile & Winning the Game

If the draw pile runs out before anyone has opened, the round is a draw and a new deal begins. If someone has opened, the discarded cards are reshuffled to form a new draw pile. The most recently discarded card is kept aside and is not reshuffled. If the reshuffled draw pile runs out again without a winner, the round is a draw.

Before play begins, the teams agree on a target score. The usual target is 400 points for a faster game; 600 points can be used for a longer game. The moment a team reaches or exceeds the agreed target, the game ends immediately.

Example: Team A has 372 points and wins a 40-point round. Their total becomes 412, so Team A wins immediately when the agreed target is 400.

10. Quick Reference

Feature	Rule
Players	4 players, 2 teams of 2
Deck	2 decks + 2 jokers
Normal hand	14 cards; dealer starts with 15
Direction	Anticlockwise
Opening	71+ points + one clean sequence
Escalation	Next unopened player must beat the previous unopened opening score
Ace	1 low, 10 high; never in the middle
Joker	Wild; maximum 1 per combination
Joker in hand	50 points at round end
Discard	Cannot discard a usable table-extension card unless holding both physical copies
13/15-card accident	Player may continue and open, but cannot finish
Unopened opponent at finish	100 points
Neither opponent opened	200 points to winning team
Game target	Usually 400; optionally 600

11. Official Game Description

BNB Rummy is a four-player team Rummy variation created and documented by Benyoub Mohamed Riadh of Tiaret, Algeria. Players compete in two teams of two, with teammates sitting opposite each other. The game uses two standard decks plus two jokers and combines a demanding 71-point opening with escalating opening requirements, shared-table combinations, strict discard restrictions, and strategic joker recovery.

The central identity of BNB Rummy is its shared table: after opening, players can extend combinations regardless of which team originally placed them. This creates interaction between all four players while the discard rules add another layer of strategy.

Recommended short description for publication

“BNB Rummy is an Algerian team-based Rummy variation for four players. Build sequences and groups, reach the 71-point opening threshold, manage wild jokers, and outplay both teams on a shared table. Created and documented by Benyoub Mohamed Riadh, Tiaret, Algeria.”
